 - **Languages:** SQL (basic–intermediate), Python
 - **Databases:** MySQL, MongoDB
 - **Tools:** Power BI, Tableau, Excel, VS Code, Jupyter Notebook, Power Point
 - **Soft Skills:** Analytical thinking, Problem solving, Stakeholder communication, Attention to detail
-

EXPERIENCE

2023–Present **SELF-EMPLOYED**

Jaipur, Rajasthan

Data Analyst

- Worked on multiple data analysis and dashboard projects using Power BI, SQL, Python, and Excel.
 - Collected and analyzed business data to understand performance, trends, and problem areas.
 - Built Power BI dashboards to track KPIs and summarize insights in a clear, easy-to-understand way.
 - Analyzed historical and current data to compare performance over time and highlight changes.
 - Cleaned and validated datasets using SQL and Python to ensure accuracy before reporting.
 - Performed exploratory data analysis (EDA) to identify patterns, outliers, and improvement opportunities.
 - Created reports and visuals suitable for management review and business discussions.
 - Approached analysis with a business mindset, focusing on practical insights rather than just numbers.
-
